Contents

VOLUME 11 NUMBER 1

1 **Editorial**

MicroReviews

3 **Regulatory implications of translational frameshifting in cellular gene expression**
H. Engelberg-Kulka & R. Schoulaker-Schwarz

9 **Mammalian and *Escherichia coli* signal recognition particles**
J. Luirink & B. Dobberstein

15 **Clonal spread of serogroup A meningococci: a paradigm for the analysis of microevolution in bacteria**
M. Achtman

23 **Homologous pairing proteins encoded by the *Escherichia coli recE* and *recT* genes**
R. Kolodner, S. D. Hall & C. Luisi-DeLuca

Research Articles

31 **Identification and characterization of a chromosomal virulence gene, *vacJ*, required for intercellular spreading of *Shigella flexneri***
T. Suzuki, T. Murai, I. Fukuda, T. Tobe, M. Yoshikawa & C. Sasakawa

43 **Topology of diphtheria toxin B fragment inserted in lipid vesicles**
V. Cabiaux, P. Quertenmont, K. Conrath, R. Brasseur, C. Capiau & J.-M. Ruysschaert

51 **Structure and expression of the alternative sigma factor, RpoN, in *Rhodobacter capsulatus*; physiological relevance of an autoactivated *nifU2–rpoN* superoperon**
P. J. Cullen, D. Foster-Hartnett, K. K. Gabbert & R. G. Kranz

67 **Molecular analysis of the *Erwinia chrysanthemi* region containing the *kdgA* and *zwf* genes**
N. Hugouvieux-Cotte-Pattat & J. Robert-Baudouy

77 **A new class of proteins regulating gene expression in enterobacteria**
A. V. Mikulskis & G. R. Cornelis

87 **The citrulline biosynthetic operon, *argC–F*, and a ribose transport operon, *rbs*, from *Bacillus subtilis* are negatively regulated by Spo0A**
M. O'Reilly, K. Woodson, B. C. A. Dowds & K. M. Devine

99 **Evidence that residues −15 to −46 of the haemolysin secretion signal are involved in early steps in secretion, leading to recognition of the translocator**
B. Kenny, C. Chervaux & I. B. Holland

111 **The relative contributions of transcription and translation to plasmid DNA supercoiling in *Salmonella typhimurium***
F. Spirito, N. Figueroa-Bossi & L. Bossi

123 **Growth phase and low pH affect the thermal regulation of the *Yersinia enterocolitica inv* gene**
J. C. Pepe, J. L. Badger & V. L. Miller

137 **Characterization of a *Pseudomonas aeruginosa* gene cluster involved in pilus biosynthesis and twitching motility: sequence similarity to the chemotaxis proteins of enterics and the gliding bacterium *Myxococcus xanthus***
A. Darzins

155 **Structure and heterologous expression of the *Ustilago maydis* viral toxin KP4**
C.-M. Park, J. A. Bruenn, C. Ganesa, W. F. Flurkey, R. F. Bozarth & Y. Koltin

165 **Genetic characterization of a *Rhizobium meliloti* lactose utilization locus**
J. G. Jelesko & J. A. Leigh

175 **Immunogenicity and evolutionary variability of epitopes within IgA1 protease from serogroup *A Neisseria meningitidis***
G. Morelli, J. del Valle, C. J. Lammel, J. Pohlner, K. Müller, M. Blake, G. F. Brooks, T. F. Meyer, B. Koumaré, N. Brieske & M. Achtman

189 **The *mutL* repair gene of *Escherichia coli* K-12 forms a superoperon with a gene encoding a new cell-wall amidase**
H.-C. T. Tsui, G. Zhao, G. Feng, H.-C. E. Leung & M. E. Winkler

203 **Glycogen in *Bacillus subtilis*: molecular characterization of an operon encoding enzymes involved in glycogen biosynthesis and degradation**
J. A. K. W. Kiel, J. M. Boels, G. Beldman & G. Venema

VOLUME 11 NUMBER 2

MicroReviews

219 **Protein prenylation in eukaryotic microorganisms: genetics, biology and biochemistry**
C. A. Omer & J. B. Gibbs

Research Articles

227 **Identification of a DNA-contacting surface in the transcription factor sigma-54**
W. Cannon, F. Claverie-Martin, S. Austin & M. Buck

237 **Molecular characterization of the clumping factor (fibrinogen receptor) of *Staphylococcus aureus***
D. McDevitt, P. Francois, P. Vaudaux & T. J. Foster

249 **The homologous operons for P1 and P7 plasmid partition are autoregulated from dissimilar operator sites**
F. Hayes, L. Radnedge, M. A. Davis & S. J. Austin

261 ***Trypanosoma cruzi* glycoprotein of *M*, 56 000: characterization and assessment of its potential to protect against fatal parasite infections**
G. Harth, A. A. Mills, T. Lin & F. G. Araujo

273 **Characterization of a 3-dehydroquinase gene from *Actinobacillus pleuropneumoniae* with homology to the eukaryotic genes *qa-2* and QUTE**
G. Lalonde, P. D. O'Hanley, B. A. D. Stocker & K. T. Denich

281 **Characterization of the dTDP-rhamnose biosynthetic genes encoded in the *rfb* locus of *Shigella flexneri***
D. F. Macpherson, P. A. Manning & R. Morona

293 ***In vivo* study of engineered G-domain mutants of *Escherichia coli* translation initiation factor IF2**
S. Laalami, A. V. Timofeev, H. Putzer, J. Leautey & M. Grunberg-Manago

303 **The function of a ribosomal frameshifting signal from human immunodeficiency virus-1 in *Escherichia coli***
E. Yelverton, D. Lindsley, P. Yamauchi & J. A. Gallant

315 **Modulating ability of *Rhizobium tropici* is conditioned by a plasmid-encoded citrate synthase**
M. A. Pardo, J. Lagunez, J. Miranda & E. Martínez

323 **Characterization of the *mutX* gene of *Streptococcus pneumoniae* as a homologue of *Escherichia coli mutT*, and tentative definition of a catalytic domain of the dGTP pyrophosphohydrolases**
V. Méjean, C. Salles, L. C. Bullions, M. J. Bessman & J.-P. Claverys

331 **Folate responsiveness during growth and development of *Dictyostelium*: separate but related pathways control chemotaxis and gene regulation**
J. H. Blusch & W. Nellen

337 **Mutational analysis of the *Bordetella pertussis fim/fha* gene cluster: identification of a gene with sequence similarities to haemolysin accessory genes involved in export of FHA**
R. J. L. Willems, C. Geuijen, H. G. J. van der Heide, G. Renauld, P. Bertin, W. M. R. van den Akker, C. Locht & F. R. Mooi

349 **Identification and molecular characterization of a major ring-forming surface protein from the gastric pathogen *Helicobacter mustelae***
P. W. O'Toole, J. W. Austin & T. J. Trust

363 **Horizontal gene transfer in the evolution of group A streptococcal *emm*-like genes: gene mosaics and variation in Vir regulons**
A. M. Whatmore & M. A. Kehoe

375 **Evidence for a general role for high-affinity non-catalytic cellulose binding domains in microbial plant cell wall hydrolases**
S. J. Millward-Sadler, D. M. Poole, B. Henrissat, G. P. Hazlewood, J. H. Clarke & H. J. Gilbert

383 **Location and orientation of an activating region in the *Escherichia coli* transcription factor, FNR**
A. Bell & S. Busby

391 ***Escherichia coli* periplasmic chaperone FaeE is a homodimer and the chaperone-K88 subunit complex is a heterotrimer**
O. Mol, R. W. Visschers, F. K. de Graaf & B. Oudega

403 **The *Clostridium perfringens* Tet P determinant comprises two overlapping genes: *tetA*(P), which mediates active tetracycline efflux, and *tetB*(P), which is related to the ribosomal protection family of tetracycline-resistance determinants**
J. Sloan, L. M. McMurry, D. Lyras, S. B. Levy & J. I. Rood

MicroCorrespondence

417 **Two related bacterial membrane proteins, ExbD and TolR, have opposite transmembrane charge dipolarity**
E. S. Hennessey & J. J. Broome-Smith

Meeting Report

419 **Eurotox-6 Conference: old bacterial toxins reveal new cell machineries**
R. Rappuoli & C. Montecucco

VOLUME 11 NUMBER 3

Research Articles

421 **Halobacterial megaplasmids are negatively supercoiled**
P. López-García, J. Antón, J. P. Abad & R. Amils

429 **The receptor for *Bacillus thuringiensis* CryIA(c) delta-endotoxin in the brush border membrane of the lepidopteran *Manduca sexta* is aminopeptidase N**
P. J. K. Knight, N. Crickmore & D. J. Ellar

437 **A plasmid-encoded $rfb_{O:54}$ gene cluster is required for biosynthesis of the O:54 antigen in *Salmonella enterica* serovar Borreze**
W. J. Keenleyside, M. Perry, L. Maclean, C. Poppe & C. Whitfield

449 **Initiation and termination of DNA transfer at F plasmid *oriT***
Q. Gao, Y. Luo & R. C. Deonier

459 **Mutational and physical analysis of F plasmid *traY* protein binding to *oriT***
Y. Luo, Q. Gao & R. C. Deonier

471 ***Bacillus anthracis* pXO1 virulence plasmid encodes a type 1 DNA topoisomerase**
A. Fouet, J.-C. Sirard & M. Mock

481 **Increased substitution of phosphate groups in lipopolysaccharides and lipid A of the polymyxin-resistant *pmrA* mutants of *Salmonella typhimurium*: a ^{31}P-NMR study**
I. M. Helander, I. Kilpeläinen & M. Vaara

489 **VsrA, a second two-component sensor regulating virulence genes of *Pseudomonas solanacearum***
M. A. Schell, T. P. Denny & J. Huang

501 **Trachoma and LGV biovars of *Chlamydia trachomatis* share the same glycosaminoglycan-dependent mechanism for infection of eukaryotic cells**
J. C.-R. Chen & R. S. Stephens

509 **Ordered cosmid library and high-resolution physical–genetic map of *Helicobacter pylori* strain NCTC11638**
N. O. Bukanov & D. E. Berg

525 **Leucine-responsive regulatory protein, IS*1* insertions, and the negative regulator FaeA control the expression of the *fae* (K88) operon in *Escherichia coli***
T. T. Huisman, D. Bakker, P. Klaasen & F. K. de Graaf

537 **Expression and role of the universal stress protein, UspA, of *Eschericha coli* during growth arrest**
T. Nyström & F. C. Neidhardt

545 **Periplasmic disulphide bond formation is essential for cellulase secretion by the plant pathogen *Erwinia chrysanthemi***
I. Bortoli-German, E. Brun, B. Py, M. Chippaux & F. Barras

555 **Adhesin regulatory genes within large, unstable DNA regions of pathogenic *Escherichia coli*: cross-talk between different adhesin gene clusters**
J. Morschhäuser, V. Vetter, L. Emödy & J. Hacker

567 **Genetic selection for mutations that impair the co-operative binding of lambda repressor**
N. Benson, C. Adams & P. Youderian

581 **An inner-membrane-associated virulence protein essential for T-DNA transfer from *Agrobacterium tumefaciens* to plants exhibits ATPase activity and similarities to conjugative transfer genes**
K. Shirasu, Z. Koukolíková-Nicola, B. Hohn & C. I. Kado

589 **Evidence for a regulatory function of the histone-like *Escherichia coli* protein H-NS in ribosomal RNA synthesis**
D. Tippner, H. Afflerbach, C. Bradaczek & R. Wagner

VOLUME 11 NUMBER 4

Research Articles

605 **Leucine-responsive regulatory protein and deoxyadenosinemethylase control the phase variation and expression of the *sfa* and *daa* pili operons in *Escherichia coli***
M. W. van der Woude & D. A. Low

619 **IpaB mediates macrophage apoptosis induced by *Shigella flexneri***
A. Zychlinsky, B. Kenny, R. Ménard, M.-C. Prévost, I. B. Holland & P. J. Sansonetti

629 **Isolation and characterization of the aspartokinase and aspartate semialdehyde dehydrogenase operon from mycobacteria**
J. D. Cirillo, T. R. Weisbrod, L. Pascopella, B. R. Bloom & W. R. Jacobs, Jr

641 **Mutagenesis of *Legionella pneumophila* using Tn*903*dll*lacZ*: identification of a growth-phase-regulated pigmentation gene**
L. A. Wiater, A. B. Sadosky & H. A. Shuman

655 **mRNAs in the methanogenic archaeon *Methanococcus vannielli*: numbers, half-lives and processing**
A. N. Hennigan & J. N. Reeve

671 **The identification of *rofA*, a positive-acting regulatory component of *prtF* expression: use of an mγδ-based shuttle mutagenesis strategy in *Streptococcus pyogenes***
G. C. Fogg, C. M. Gibson & M. G. Caparon

685 **Regulation of nitrogen metabolism is altered in a *glnB* mutant strain of *Rhizobium leguminosarum***
M. Amar, E. J. Patriarca, G. Manco, P. Bernard, A. Riccio, A. Lamberti, R. Defez & M. Iaccarino

695 **Molecular cloning and sequence of *comK*, a gene required for genetic competence in *Bacillus subtilis***
D. van Sinderen, A. ten Berge, B. J. Hayema, L. Hamoen & G. Venema

705 **The binding of *Pseudomonas aeruginosa* pili to glycosphingolipids is a tip-associated event involving the *C*-terminal region of the structural pilin subunit**
K. K. Lee, H. B. Sheth, W. Y. Wong, R. Sherburne, W. Paranchych, R. S. Hodges, C. A. Lingwood, H. Krivan & R. T. Irvin

715 **The pili of *Pseudomonas aeruginosa* strains PAK and PAO bind specifically to the carbohydrate sequence βGalNAc(1-4)βGal found in glycosphingolipids asialo-GM_1 and asialo-GM_2**
H. B. Sheth, K. K. Lee, W. Y. Wong, G. Srivastava, O. Hindsgaul, R. S. Hodges, W. Paranchych & R. T. Irvin

725 **Identification and cloning of a *fur* homologue from *Neisseria meningitidis***
C. E. Thomas & P. F. Sparling

739 **Isolation and characterization of IS*31831*, a transposable element from *Corynebacterium glutamicum***
A. A. Vertès, M. Inui, M. Kobayashi, Y. Kurusu & H. Yukawa

747 **The cellulose-binding domain of endoglucanase A (CenA) from *Cellulomonas fimi*: evidence for the involvement of tryptophan residues in binding**
N. Din, I. J. Forsythe, L. D. Burtnick, N. R. Gilkes, R. C. Miller, Jr, R. A. J. Warren & D. G. Kilburn

757 **Molecular analysis of RepHI1A, a minimal replicon of the IncHI1 plasmid R27**
P. J. Newnham & D. E. Taylor

769 **Regulation of the permeability of the gonococcal cell envelope by the *mtr* system**
W. Pan & B. G. Spratt

777 **An ABC-transporter from *Streptomyces longisporoflavus* confers resistance to the polyether-ionophore antibiotic tetronasin**
K. J. Linton, H. N. Cooper, I. S. Hunter & P. F. Leadlay

787 ***Entamoeba histolytica*: electron-dense granule secretion, collagenase activity and virulence are altered in the cytoskeleton mutant BG-3**
J. Serrano, M. de la Garza, M. A. Moreno, R. Tovar, G. León, V. Tsutsumi & M. Muñoz

793 **Nodulation protein NodL of *Rhizobium leguminosarum* *O*-acetylates lipo-oligosaccharides, chitin fragments and *N*-acetylglucosamine *in vitro***
G. V. Bloemberg, J. E. Thomas-Oates, B. J. J. Lugtenberg & H. P. Spaink

VOLUME 11 NUMBER 5

MicroReviews

805 **Cdc7 protein kinase for DNA metabolism comes of age**
R. A. Sclafani & A. L. Jackson

811 **The cold-shock response — a hot topic**
P. G. Jones & M. Inouye

Research Articles

819 **Reversible topology of a bifunctional trans-membrane protein depends upon the charge balance around its transmembrane domain**
H. Kim, S. Paul, J. Jennity & M. Inouye

833 **Family of the major cold-shock protein, CspA (CS7.4), of *Escherichia coli*, whose members show a high sequence similarity with the eukaryotic Y-box binding proteins**
S. J. Lee, A. Xie, W. Jiang, J.-P. Etchegary, P. G. Jones & M. Inouye

841 **Two novel families of bacterial membrane proteins concerned with nodulation, cell division and transport**
M. H. Saier, Jr, R. Tam, A. Reizer & J. Reizer

849 **Cloning and characterization of the RNase P RNA genes from two porcine mycoplasmas**
S. G. Svärd, J. G. Mattsson, K.-E. Johansson & L. A. Kirsebom

861 **The DnaK homologue of the marine *Vibrio* sp. strain S14 binds to the unprocessed form of a carbon starvation-specific periplasmic protein**
L. Holmquist, D. R. Nelson & S. Kjelleberg

869 **The molar ratio of σ^{73} to core polymerase in the obligate intracellular bacterium, *Rickettsia prowazekii***
H.-F. Ding & H. H. Winkler

875 **A locus involved in the regulation of replication in plasmid pSC101**
D. Manen, G. Xia & L. Caro

885 **Contribution of genes from the capsule gene complex (*cps*) to lipooligosaccharide biosynthesis and serum resistance in *Neisseria meningitidis***
S. Hammerschmidt, C. Birkholz, U. Zähringer, B. D. Robertson, J. van Putten, O. Ebeling & M. Frosch

897 **Disruption of two genes for chitin synthase in the phytopathogenic fungus *Ustilago maydis***
S. E. Gold & J. W. Kronstad

903 **Open complex formation by DnaA initiation protein at the *Escherichia coli* chromosomal origin requires the 13-mers precisely spaced relative to the 9-mers**
J. Hsu, D. Bramhill & C. M. Thompson

913 ***Escherichia coli cad* operon functions as a supplier of carbon dioxide**
M. Takayama, T. Ohyama, K. Igarashi & H. Kobayashi

919 **Coupling between mRNA synthesis and mRNA stability in *Escherichia coli***
J. Chow & P. P. Dennis

933 **DNA supercoiling and thermal regulation of unsaturated fatty acid synthesis in *Bacillus subtilis***
R. Grau, D. Gardiol, G. C. Glikin & D. de Mendoza

943 **Repression of *tonB* transcription during anaerobic growth requires Fur binding at the promoter and a second factor binding upstream**
G. M. Young & K. Postle

955 **Anaerobic activation of *arcA* transcription in *Escherichia coli*: roles of Fnr and ArcA**
I. Compan & D. Touati

965 **Isolation and characterization of hypophosphite-resistant mutants of *Escherichia coli*: identification of the FocA protein, encoded by the *pfl* operon, as a putative formate transporter**
B. Suppmann & G. Sawers

VOLUME 11 NUMBER 6

MicroReviews

983 **Rho and RNA: models for recognition and response**
T. Platt

991 **Regulation of the *Bacillus subtilis trp* operon by an RNA-binding protein**
P. Gollnick

999 **Structural dynamics of translating ribosomes: 16S ribosomal RNA bases that may move twice during translocation**
M. Laughrea

Research Articles

1009 **The growth phase-dependent synthesis of cyclopropane fatty acids in *Escherichia coli* is the result of an RpoS(KatF)-dependent promoter plus enzyme instability**
A.-Y. Wang & J. E. Cronan, Jr

1019 **Expression of *Escherichia coli* pyruvate oxidase (PoxB) depends on the sigma factor encoded by the *rpoS*(*katF*) gene**
Y.-Y. Chang, A.-Y. Wang & J. E. Cronan, Jr

1029 **Starvation-induced expression of SspA and SspB: the effects of a null mutation in *sspA* on *Escherichia coli* protein synthesis and survival during growth and prolonged starvation**
M. D. Williams, T. X. Ouyang & M. C. Flickinger

1045 **Phosphorylation of elongation factor G and ribosomal protein S6 in bacteriophage T7-infected *Escherichia coli***
E. S. Robertson, L. A. Aggison & A. W. Nicholson

1059 **Characterization of the carbon starvation-inducible and stationary phase-inducible gene *slp* encoding an outer membrane lipoprotein in *Escherichia coli***
D. M. Alexander & A. C. St John

1073 **Cloning and characterization of *ppiB*, a *Bacillus subtilis* gene which encodes a cyclosporin A-sensitive peptidyl-prolyl *cis–trans* isomerase**
M. Herrler, H. Bang & M. A. Marahiel

1085 **Interaction of the *Chlamydia trachomatis* histone H1-like protein (Hc1) with DNA and RNA causes repression of transcription and translation *in vitro***
L. B. Pedersen, S. Birkelund & G. Christiansen

1099 **Conjugative transposition of Tn*916*: preferred targets and evidence for conjugative transfer of a single strand and for a double-stranded circular intermediate**
J. R. Scott, F. Bringel, D. Marra, G. Van Alstine & C. K. Rudy

1109 **A new component of bacteriophage Mu replicative transposition machinery: the *Escherichia coli* ClpX protein**
A. Mhammedi-Alaoui, M. Pato, M.-J. Gama & A. Toussaint

1117 **The *Pseudomonas fluorescens* lipase has a *C*-terminal secretion signal and is secreted by a three-component bacterial ABC-exporter system**
F. Duong, C. Soscia, A. Lazdunski & M. Murgier

1127 ***pecS*: a locus controlling pectinase, cellulase and blue pigment production in *Erwinia chrysanthemi***
S. Reverchon, W. Nasser & J. Robert-Baudouy

1141 **Transcriptional regulation of *prfA* and PrfA-regulated virulence genes in *Listeria monocytogenes***
J. Bohne, Z. Sokolovic & W. Goebel

1151 **Lon-dependent proteolysis of CcdA is the key control for activation of CcdB in plasmid-free segregant bacteria**
L. Van Melderen, P. Bernard & M. Couturier

1159 **Cloning of the *nupC* gene of *Escherichia coli* encoding a nucleoside transport system, and identification of an adjacent insertion element, IS*186***
J. E. Craig, Y. Zhang & M. P. Gallagher

1169 **TMAO anaerobic respiration in *Escherichia coli*: involvement of the *tor* operon**
V. Méjean, C. Iobbi-Nivol, M. Lepelletier, G. Giordano, M. Chippaux & M.-C. Pascal

1181 **Antigenic drift of non-encapsulated *Haemophilus influenzae* major outer membrane protein P2 in patients with chronic bronchitis is caused by point mutations**
B. Duim, L. van Alphen, P. Eijk, H. M. Jansen & J. Dankert
